

INVITATION HYBRID SYMPOSIUM

'BICYCLE ECHOCARDIOGRAPHY: DYSPNEA AT EXERCISE'

SATURDAY 17 OCTOBER 2020

JESSA
ZIEKENHUIS

Hartcentrum Hasselt

Dyspnea at exercise is a daily recurring complaint. Examination should be done during exercise and not at rest. For this the bicycle echocardiography is becoming more and more common. In this fourth training course we want to provide the clinical cardiologist with insights into the diagnostics and its consequences for treatment. We will explaining this through a number of specific cases.
